# RAPIDPULL™

Rapidpull™ is a UL and CSA listed custom manufactured wire assembly built to your specifications. You can choose any combination of wire type, gauge, color and stranding - building wire, electronic cable, coax, and telecommunications. Each conductor within the assembly is printed with an alpha-numeric ID that is repeated every two inches along the entire length. The conductors are factory bundled into a parallel configuration with either a waxed nylon binder or intermittent "pull tabs". Each bundle contains a sequential footage tape. The assembly arrives on your site pre-spooled, pre-tagged, ready to be "pulled". Best of all most orders ship in 48 hours. You save time and money!

Rapidpull™ cables are available in configurations using #2AWG thru #18AWG THN, THWN, TFN, TFFN, XHHW, co-axial — or any unjacketed combination of power, control, or communications conductors you specify! Here's a quick reference chart for commonly used THHN cable. All assemblies are UL listed and spark tested.

Catalog No.	No. of Conductors	#16 AWG TFFN/MTW		#14 AWG THHN/THWN		#12 AWG THHN/THWN
