All values are nominal and subject to correction

#Not rated for direct burial

\*Ampacities are based on Table 310.15(B)(16) of the NEC 2017 Edition for no more than three current carrying conductors at conductor temperatures of 90°C, and ambient temperature of 30°C.

**Application:** Aluminum PV Photovoltaic Cable is suitable for use as interconnection wiring of grounded and ungrounded photovoltaic power systems. The cable is for applications up to 600 volts and temperatures from -40°C to +90°C wet or dry.

**Conductor:** Compact or compressed round stranded 8000 series aluminum alloy conductor

**Insulation:** Cross-linked polyethylene (XLP), oil and sunlight resistant, direct burial rated

**Standards:** ASTM B800, B836, B901  
 UL listed PV Wire per UL 4703  
 Type RHH/RHW-2 or USE-2 per UL 44 and UL 854  
 VW-1, UL listed  
 Sunlight Resistant, UL listed  
 Direct Burial 6AWG and larger, UL listed

**1-800-945-5542**
